

Unique expertise in polypropylene recycling

EFFICIENT SOLUTIONS FOR THE RECYCLING OF YOUR WASTE AND SCRAP

Thanks to its full service of collection and processing of waste and scrap, C2P is a preferred partner in PP recycling for industrial companies, collectors, sorting centers, crushers and so on.

Our procedures guarantee full traceability: C2P will give you a certificate of the effective and responsible processing of the waste and scrap you have supplied.

A GLOBAL EXPERTISE

Key player in Europe's circular economy, C2P offers unique expertise in recycled raw materials and historical know-how in polypropylene. With more than 30 employees on its plant in Villefranche-sur-Saône in France, C2P can recycle 15,000 tonnes of waste and scrap, and produce 13,000 tonnes of polypropylene compounds each year.

Choosing C2P means choosing an industrial vision serving the environment, high added value technical expertise, a team working closely with suppliers and customers, as well as a recognized brand.

Adding value to your PP waste and scrap

THE BEST OF RECYCLING FOR YOUR WASTE AND SCRAP

Founded in Villefranche-sur-Saône in 1988, C2P brings value to your plastic waste and scrap by producing high quality polypropylene compounds. Post-consumption or post-industrial waste, production purges, shred of battery cases, vehicle bumpers, bottle caps... we purchase polypropylene in all its forms.

In an ever more competitive market, C2P guarantees reliability, traceability, expertise and innovation to its customers and suppliers alike. Choosing C2P means choosing a partner which is aware of its industrial, commercial and environmental responsibilities.

THE BEST LASTING COMMERCIAL RELATIONSHIP

GETTING IN TOUCH

We decide quickly whether your materials fit our needs or not. We work together to establish the best conditions to satisfy your expectations.

1

2

CHECKING

Grinded material or that still needs to be, a preliminary investigation is compulsory to recycle your materials at the best conditions. As well as building a mutual trust!

3

AUDITING

A diagnosis of your plastics waste and scrap flow allows us to develop a full recovery service to suit your business: collection, sorting, recycling, work under contract, etc.

4

ANALYSING

Detailed examination by our laboratory is a core element in accepting your waste and materials. This analysis allows us to confirm that the material can be recycled and predict which quality of recycled product we can obtain.

SUPPLYING

We can supply storage containers (dumpsters, wire mesh boxes, FMA moving floor tippers) and manage the logistics. Our hauliers meet your requirements. In order to ensure this, we select them based on rigorous specifications.

5

6

PROCESSING

Shredding, grinding, washing, extrusion – our complete process allows us to treat all sizes of PP waste and scrap. We can also offer work under contract.

LONG LASTING

C2P is committed to building a relationship of trust and partnership with you. The quality of our services, respect for mutual undertakings, and guarantee of environmentally friendly processes are therefore all included in our Supplier Quality Charter.

7

C2P's facility is certified:

- ISO 9001:2015 for Quality,
- ISO 14001:2015 for the Environment,
- OSHAS 18001:2007 for Health and Safety.

C2P offers reliable solutions for the sustainable recycling of polypropylene, contributing to a more responsible European supply chain for secondary raw materials.
